A Grand Story of one of the Biggest Events in History.

A real cast as noted above.

THIS WEEK

“THE NOOSE”

Local and General

Frank Dalgin and family are now located in Edmonton where Mr. Dalgin has secured a position in the smelting line.

The Pioneer elevator is being rushed rapidly and will soon be a factor in handling the crop. Mr. F. Hamilton will be in charge.

Mr. and Mrs. G. Moore of Toronto, were guests of their niece, Mrs. G. L. Dupre during last week, leaving for Vancouver on Monday where they intend to make their future home.

The new loading platform was available for unloading machinery on Saturday and a considerable number of cars that had been standing on the track for some time were unloaded.

Mr. and Mrs. J. Fields of Calgary, and family, spent the weekend with Mr. and Mrs. F. J. Clapp. Mr. Fields is Mrs. Clapp's brother.

Mrs. Neilson (nee Eleanor Fields) is the guest of her sister, Mrs. F. J. Clapp.

Inquiries for houses on the part of those who desire to move into the town for the winter are very prevalent with not very satisfactory results as the supply is away below demand and only a few will be able to secure houses.

A real estate deal of importance occurred this week when W. W. Sloan disposed of 960 acres of land east of Champion to John Klein, the consideration being \$35.00 per acre. Mr. Klein is rapidly becoming one of the biggest landowners in the district.

Up to date practically every bushel of grain brought to town is in trucks, the horses having been entirely replaced by their old hauling capacity. The result is that the grain is standing in the field and an hour later is in the elevator bins.

Purchases of farm machinery have been very extensive this year and with the damaged crop promise to be a very heavy one. The grain crop is now so unsound, heavy and promised such favorable returns that no one can be blamed for the situation.

An engine being unloaded for G. D. Smith has been damaged and is now on to the loading platform. Only slight damage was done in the accident, and the turning of the engine right side up afforded an attractive display for a large number of spectators.

K. R. McLean, optometrist of Calgary, has had a number of visits to the Drug Store, wishes to announce that he has now associated with him, Mr. A. Melville Anderson, optometrist of Calgary. Regular visits will be maintained as heretofore with Calvert Optometrist, Av. 1.

Preparations for the opening of the duck season in September are in evidence in the way of guns and ammunition in the hardware stores, while many plans on the part of sportsmen for opening day are being discussed. It is worthy of note that the opening day is the 16th and not the 15th as in former years.

School opened on Tuesday morning with a complete staff in charge, one additional teacher being employed this year. R. L. Baker, B. A., is again principal of the school. C. E. Edmonson takes Grades I and II. The new school building is completed. Miss Smithson's classes are housed in the basement.

While the government crop report estimates the damage from frost as not exceeding 10 per cent there is little doubt that threshing will show a much larger percentage of the crop as being damaged. It is estimated that fully 200 less men will have been required for this harvest as a result. When combines are in general use harvester excursions will be a thing of the past as the number of men required will be but slightly in excess of those kept at work during the summer months.

The difference between combines and the old method of binding and threshing has been illustrated forcibly this year and ought only a portion of the crop to be being harvested by combines. It is estimated that fully 200 less men will have been required for this harvest as a result. When combines are in general use harvester excursions will be a thing of the past as the number of men required will be but slightly in excess of those kept at work during the summer months.

You Can Make a Great Saving

on your food bills for the Cook Car and the Home when you purchase your supplies at our store. Uniformly low prices. Quality and Freshness guaranteed.

4.00

Fine Pure Wool Combinations, full fashioned, extra well made and finished, closed crotch, snug fit cuffs and ankles, price.

5.50

JOPPLINGS

Threshing operations should be in full swing by the first of the week and any suggestion of a over supply of grain is a mere dream. Many outfits are ready to begin work as soon as the farmers are ready.

Orville Harper is among the fortunate farmers in this district having just completed threshing 200 bushels of fall wheat which produced 7,100 bushels. Several cars of this grain have been shipped to the Pool elevator and graded No. 2 in Calgary. The grain is a splendid sample showing practically no damage from threshing.

Deliveries of spring wheat reached considerable proportions during the week and the weather helped them along in a very large movement daily in future. The quality varies considerably and the bulk of the wheat will be of a low grade owing to dry, hot weather late in July and early in August followed by frost. The yield has also been improved.

It must be considered a matter of regret that the corner stone of the handsome new school building was laid without ceremony. With such a speech making talent as was available, surely the school board have not failed to be long remembered. What happened to the people in charge?

With such a splendid opportunity going to waste why did not the chairman of the school board or the secretary step in and fill the void, calling on the town officials for any help needed. It would have given everybody a chance to dress up and have a good time and the town might have been a better place to live in had the school been completed. Think of the write-ups which could have been sent to the daily papers and the advertising that would have resulted. It was really too bad to miss such a chance.

THURSDAY, Sept. 6, 1928

EIGHTH CROP REPORT—ISSUED BY DEPARTMENT OF AGRICULTURE, GOVERNMENT OF ALBERTA, EDMONTON, SEPT. 1st, 1928

Broken weather during the first two weeks in August caused a temporary stoppage and delayed harvesting a few days. The warm weather of the past ten days has been favorable for drying the grain for cutting, but in drying the grain for cutting, the cutting is now general over the entire province. The Peace River country reports that cutting has been completed and is expected to be general by next week. Central and southern parts of the province report 25 to 30% of cutting done, and harvesting is now well advanced in the province to date and an estimate can be made at the present time of the yield of the different areas. It is estimated that, however, any increase in yield of wheat over that of 1927. The quality of the grain is considered throughout the province to be good.

Frosts have occurred in almost all parts of the province but these have been confined to small areas and the average frost has been light. The frost for the province will be small, not more than 10% at the most. Hail damage has been heavy also in a few areas, but the damage for the province will be less than last year. The percentage is estimated to be approximately 14% of the insured area, as against 20% last year. The crop in general has been singularly free from disease and insects.

Wheat appears to be plentiful throughout the province, wagons running from \$3.50 to \$4.00 per day. Swathing machines and combines are being used more generally in the province than was the case last year and harvesting should go forward rapidly.

The acreage sown to wheat will be less than estimated at the beginning of the season owing to the dry weather at wheat sowing time. The land, however, was sown with more grains and the total acreage of the province is approximately the same as estimated.

The best crop of Southern Alberta is progressing well and promises a good yield per acre.

NATIONAL COUNCIL OF WOMEN OF CANADA—FOUNDATION FUND

With the holiday season coming to a close, local councils of the National Council of Women of Canada throughout the Dominion are getting ready for the efforts to be made by the organization during the latter part of next month or in early November to raise a foundation fund of \$200,000.

Mr. Frederick Etherington, of Kingston, Ont., first vice-president of the National Council and convenor of the Foundation Fund Committee, and Capt. H. H. Bradford, director of the project, recently completed a tour of the western provinces in the interests of the fund movement during which meetings were held with the representatives of local councils.

Mrs. J. A. Wilson of Ottawa, Ont., president of the National Council, who returned to Canada last week after an extended stay in England, is preparing to play an active part in the campaign as are many other officers. Mrs. Wilson attended the National's activities at the Canadian National Exhibition in Toronto, where with other national, provincial, and local officers she met the thousands who visited the ten booths under the supervision of the Council in the Women's Building.

Reports from the western cities were that Mrs. Etherington and Capt. Bradford, in their meetings with the councils there are enthusiastic about the Foundation Fund movement and with a success to make the enterprise a success in the next months the convenor and director will visit the east and the central provinces to include their itineraries probably will be Ottawa, Montreal, Quebec, St. John, and Halifax.

The Fund effort will be the first Dominion wide appeal in the history of the National Council of Women. It will eliminate the necessity of local appeals in the future and will increase the usefulness of the organization, which in the past has been responsible for many improvements of national scope.

GOVERNMENT TO TRY OUT WA-TER AIR MAIL SERVICE ON FIRST FLIGHT—TO TEST FEASIBILITY OF TRANS-CONTINENTAL MAIL SERVICE

Ottawa, Sept. 25.—A one day flight from Ottawa to Vancouver to test the feasibility of a transcontinental air mail service is proposed by the government as soon as possible. It was decided in conjunction with the post office department, it was learned today.

Squadron Commander A. S. Godfrey, who will make the flight, expects to be in Vancouver on Nov. 10. In the next few days to test the large amphibian being specially constructed for the attempt.

On Sept. 10 Godfrey hopes to take off on the long flight westward within two weeks. Unless strong head winds force the plane down, it is expected to make only one stop, at the government air base on the shores of Cormorant Lake in northern Manitoba.

On his return journey Mr. Godfrey will visit all air stations in the western provinces and will probably fly to the Peace River area, a distance of nearly 900 miles, and covered and the flight will be of the longest ever attempted, it is claimed.

Arrangements have practically been completed with the post office department to carry a bag of mail to Vancouver.

It will be one of the largest planes in Canada and will carry 400 gallons of gasoline.

The plane is being lent

to the government and

it may be purchased for air mail purposes if the government flight proves successful.

The recent pool interim payment, which brought the price already paid to our members for the last year's

benefits furnished by the treaty. Thus, if a similar state of affairs to that existing at the time the other contracting parties are released from their obligations under the treaty, to that state.

In the present treaty, Secretary Kellogg of the United States declared it does not restrict or impair in any way the right of self-defense of a state, and the League of Nations covenant since the covenant imposes no affirmative military obligation to war.

Now, due to the fact that with the Locarno peace pact, Mr. Kellogg has agreed to the Locarno treaties as under any interpretation of the Locarno treaty, it is clear, such obligation certainly would not attach until one of the parties has violated either of these treaties. And since all the three signatories to the Locarno treaty also attach the Locarno treaties could not be violated by the Kellogg-Briand pact.

Summary of Treaty

Paris, Aug. 27.—The 1928 reconfirmation of war-time conditions for the prevention of international controversies and the signatories renounce it as an instrument of policy.

The treaty provides that settlement of disputes or conflicts of whatever nature or whatever they may be shall be sought only by pacific means.

The preamble declares that any signatory power which seems to resort to war shall be denied the

right to use its national interests by reference to war shall be denied the

right to use its national interests by reference to war shall be denied the

right to use its national interests by reference to war shall be denied the

GAS BUMP SNUFFS OUT FERNS' MINERS' LIVES—SIX DIES IN BUNKER AT COAL CREEK WHEN OVERPOWERED BY DEADLY FUMES; VALIANT WORK BY RESCUE PARTIES

The dead in Thursday's mine disaster at Fernie are:

Peter Dowie, married.
Tony Casoli, married.
Joseph P. Morris, married.
George Perkins, Sr., married.
Tony Spok, married.

Tony Degors, married.

Fernie and Coal Creek mining centre due to a disaster in No. 1 east mine, Coal Creek, which occurred at seven o'clock Thursday morning, snuffing out the lives of six workers.

The cause of the tragedy is technically unknown, as having been a blowout of gas from the gas face in No. 16 slope, and the deadly fumes immediately spread over a very large district of the mine.

Still unknown.

The victims, according to reports of the mine rescue crews who recovered the bodies, in all cases must have been in normal working condition when they had descended from their working places some distance from the surface, when they were overtaken by the fatal fumes. Hundreds of tons of finely broken coal were blown out from the source of the blowout, causing in the entries and passageways, making it impossible for rescue parties to penetrate underground to the innermost points in order to assess the damage to walls and possibly the cause of the gas and fumes blowout. An indication of the widespread area of the mine affected by the accident was shown by the finding of a sunken coal seam two thousand feet from the assumed

point of origin.

Two hundred miners were employed in the workings and all but six victims were able to make their way to the surface uninjured. That the men who met death had made unusual exertions is indicated by the fact that was indicated by the finding of their bodies at a considerable distance from where the blow-out is believed to have occurred.

Valiant Work by Rescue Parties

Fernie and Coal Creek mine rescue valiantly plunged into the thick smoke and darkness after the occurrence, while numbers of follow mine workers stood by to render assistance. Several rescue workers were temporarily overcome by the fumes and over-exertion in their endeavor to rescue the entombed miners. The first three bodies were brought to the surface about 12 o'clock, some five hours after the blast. The last three were brought out shortly after six o'clock.

John Simms, mine safety inspector, hurried to the scene and acted in an advisory capacity. He was assisted by Inspector Ward while J. P. Dunn, manager of the Fernie mine rescue station, was in charge of rescue apparatus. This was rushed to the colliery by special train.

John Simms, chief inspector of mines for British Columbia, left Victoria last night for the scene of the disaster. He will arrive Saturday morning.

Investigation Under Way

Coroner Dutie ordered an inquest to convene last evening when, after formal viewing of the bodies, an adjournment was made before evidence is taken.

It is slightly over eleven years since the first case of cancer has occurred in the collection of the Crow's Nest Pass Coal Co. here. In April, 1917, thirty-five miners lost their lives in an explosion.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION—CANCER

With the knowledge that we now possess, the cure of cancer is only possible when the disease is recognized early and proper treatment started at once.

One of the reasons for advising that every person should go to his family physician once a year is for a health examination, primarily for the discovery of disease in its early stages, and so permit of treatment at a time when it offers the best chance of cure. Otherwise, it is left to the untrained lay person to decide for himself that he is in need of medical care.

For the particular benefit of this latter group, it is pointed out that they occur, also, in considerable danger signals, and should turn these persons in the direction of their family physician without delay. Everyone who experiences one of the following symptoms should see a doctor, but it requires medical skill to decide whether or not the

symptoms which are present mean cancer.

In the early stages, cancer is a local condition, and, if it is completely removed, there will be no recurrence. If it is not removed, it spreads to other parts of the body and to other organs, such as other parts. This is the simple explanation of the need for proper early treatment.

Any lump, particularly in the female breast, any abnormal discharge, any sore that does not readily heal, any wart or mole that changes in size or appearance are danger signals.

Danger may not occur in the early stages. The cancer may be a local condition and, if it is removed, there is no pain is mistaken, and, as a result he may allow the time for cure to slip past.

Most physicians have knowledge, experience and skill are at the service of the public, but they must wait until the public decide to call upon them.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

FIRST DEFINITE CLUE RE-GARDING FATE OF AMUNDSEN

Tomato, Norway, Sept. 1. The first definite clue to the fate of the Roald Amundsen and five men who accompanied him on his expedition to the North Pole, the Arctic, was brought here today. It was a float from the seaplane in which the adventurers sailed for Spitsbergen on Aug. 18.

The float was found by a Norwegian fishing vessel, the Brood, it was picked up near the Fuglo Islands, a rock group off the port of Arctic, the steamer Michel Sars and the French vessel Durac identified the float as belonging to the French naval seaplane *Latham* in the command role with René Guibaud as pilot.

Ship Were Lost

Comparison of the float with the plane which was last seen tended to confirm the identification.

Besides Amundsen and Guibaud, the plane carried Lt. Lieb Dietrichson, three French navy men comprising the regular crew of the plane.

The *Latham* had been operating off Vann Island out from Tromsø Saturday morning. Captain Haag told the authorities that he had picked up the float last night about six miles northwest of Phosphoribothane near a small island, Vann Island.

The French crew in Tromsø used the float to compare with photos of the *Latham* and said there was doubt that it had been part of the Amundsen plane.

Last Hope Given Up

Oslo, Norway, Sept. 1. Discovery of the portion from the Amundsen plane is proof that he and his five companions have perished in the polar region of Otto Sverdrup, noted Arctic explorer.

He believes that the disaster occurred before the big *Latham* seaplane reached Bear Island on its flight from Tromsø. He bases this fact that there were many fishing vessels near the island at that time. He said he saw the plane or found traces of it in the neighborhood.

The captain accounted for the *Latham*'s disappearance by saying the *Latham* Islands by saying that it was very light and therefore the winds, which have been from the northwest all day, were strong enough to blow the Norwegian coast despite the currents setting in a different direction.

K. R. McLean, R. O. SIGHT SPECIALIST, 208, EIGHTH AVENUE, W., CALGARY, WILL MAKE HIS MONTHLY PROFESSIONAL VISITS TO CHAMPION, AT THE DRUG STORE, FRIDAY, SEPTEMBER 28TH.

THE BIBLE TEACHES THAT MAN CANNOT SAVE HIMSELF

Ephesians 2: 8 and 9—“For grace are ye saved through faith; and that not of yourselves: it is the gift of God; not of works, lest any man should boast.”

Therefore the Lutheran Church teaches:

YOU CANNOT EARN SALVATION.

You are invited to attend Lutheran Services in Champion Church Sunday Sept. 9th, at 2:00 p.m.

REV. F. DUENSEN, Pastor.

Yorkton Board, fifteen months old, Apply to Felix Strauss, Champion.

TEAMS WANTED

One man with four horses to draw

water, also ten men with wagons

and bundle racks. Apply to G. R. Smith, Phone 20, Champion.

Don't Delay—Get the Goods You are Going to Need!

With the big demand for goods over Western Canada goods are going to be hard to get, in fact it is hard to get many staple lines now.

We have on hand a wonderful stock to choose from. Our stock is complete and quality is guaranteed.

Simmons' Bedding

Harvester Springs and Mattresses

Shell Tractor and Motor Oils

Alemite Grease

Linoleum and Congoleum

Dinnerware, plain or fancy

Table Oilcloth

Granite and Galvanized Ware

Belting and Threshers' Supplies

Sockets and Wrenches for every purpose

Grain Scoops

Forks of every description

Roofing and Building Papers

Let us fill your requirements as early as possible. Selection is better and you are sure of getting the goods.

CONCLUSION

At Arthur Warner's bungalow the flowers were blooming. Hollyhocks stood straight and tall in the flower beds, with their queer, old-fashioned roses in prim rows on the stalks, crimson and cream and white. Arthur had planted them, but had not seen the flowers bloom. The walk from the house was bordered with great clumps of dwarf nasturtiums, orange and red, alternating with mounds of sweet alyssum and candytuft, white as snow, and at their feet in a straight line, marking the edge of the garden, the old path ran through a grove of ground lobelia, blue and the shiny leaves.

On one side of the walk stood a rocky stone from the river, which Helmi had whitewashed, and from which now grew trailing nasturtiums, in shades of yellow, from which pink to scarlet. The blossoms dropped out from their glossy green leaves.

On the other side was a rustic bench made gay with cushions, where one could sit and think and dream, watching the changing lights upon the mountains.

Here sat Helmi, thinking and dreaming, this Saturday afternoon in late August. Her family had all gone to Eagle Mines—Rose and Dandy, too, who were still on the holidays with her old Sis and young Lill, the latter now an energetic young lady of two and a half years. The teacher, too, who boarded at the bungalow, had gone to town.

Todays' letter Helmi had sent to town, a load of vegetables and fresh fish from the English River, and steadily her savings in the bank were increasing. It seemed a long time since she had climbed into the old buckboard with her father, old Mr. Clegg, beside her, and the pups a box behind, and canvassed the neighborhood to see where she could get a cow "on terms to suit purchase." She had been told that all the cows were kept in the cow houses with her, so terms being that she do the weekly washing for the numerous and increasing Peterson family, three miles away.

Her thoughts of her neighbors met with real reaction. They had all befriended her, and she was glad to know that Arthur Warner had learned to know these better. Helmi had often told them quite frankly all she knew of him, and when her father had asked her if she meant to marry them. When she made the suggestion that weekly meetings should be held at his house, where knitting and sewing could be done for the women, the men had gladly come in to bear their share of the next came to the settlement. Every week a letter was written to him, and parcels sent, so it came about that, though thousands of miles intervened, Arthur Warner had come to know his neighbors and they him. No letters had come from Arthur.

"PINKHAM'S COMPOUND IS WONDERFUL"

Read This Letter from a Grateful Woman

Vancouver, Ont.—"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had it for 10 years and my four and living and my young baby boy now eight months old is the strongest and healthiest baby I have. I have taken your medicine since the time of my birth and have certainly recommended it to all my friends to take it as I am sure it will receive the same results as did... Miss. MURKIN VANESSA, Ontario.

church there is a well appointed dining-room, where the girls often entertain their parties.

The bungalow is a cabin-like house, the miners and their wives, and on the lawn there is a simple white stone with an inscription which reads:

"Sacred to the Memory
of
ARTHUR WARNER,

who made the first settlement in this valley, and who loved its solitude and beauty.

In 1914

he answered the call of his country.

On January 25th, 1917

while escaping from a German prison camp, he deliberately gave his own life to purchase freedom for his companion, who now erects a stone to the hero as he lies as grass grows in the valley and water runs in the English River, the memory of ARTHUR WARNER may not fade.

THE END

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Issued by The Canadian Dental Hygiene Council and Published By The Standard Dawson Dental Society

1929

Count them—two line back of each cupid, making eight all told. "Bi-to-cupid"—tooth with one point, or "cusp"—so this then, is the name of the tooth. You have doubtless observed, however, that the inner cusps of the lower molars are often broken off, so that the teeth tremble or give way, especially to the well child they will not stand long. The cusps are guaranteed to be absolutely harmless to the new-born babies. They are especially good in summer because they keep the tongue sweet and pure.

But Helmi had not yet got the sight of the storm, when her son was lifted high above the mists of earth.

The hearts of the women were anxious for Helmi's because she had no way of comforting them in their distress. There was strength in the touch of her hand, and healing in her presence.

"Look what she's done for me," old Sis would often say, "when I got cold, she'd put her hands over my feet and make me warm again. Come in, Sis," she said. I am all alone except for little Lill and the dogs, and I need you, Sis," she says, "for company, too. I can't do it alone. Look what a home she has given me."

It was Helmi, too, who discovered the seam of coal a little further up the river, shined and hard, with a sharp flame and gave off most intense heat. "I wonder if any other coal she had ever seen; and it was like her to tell all the neighbors about it and urge them to come and get all they wanted for their winter fires.

She was a woman of great courage who worked hard and have a clear conscience. She was Helmi's that afternoon as she listened to the waterfall behind the house, and through her dressing came the happy consciousness that her family would soon be home from town and she would need to go into the house and get ready supper.

The valley before her was beginning to show the purpling hints of evening, and the sun wheeled its way over the mountains and came quickly around the turn of the hill, its wheels making no sound in the dusty road. It was half way to the house before Helmi saw who it was.

"Hello, Jack! You can't part with her," he said. "Remember I am two years and a half behind," he said. Helmi bent over him as she tucked the shawl around the little girl. "You won't leave me, Jack," she said, "but—no, I'm going to bed. Jack and Helmi sat long before the fire. Little Lill in her pretty, white nightdress was fast asleep in her father's arms.

"Hello! I tell you, I'm not going to bed," said Helmi. Jack bent over her as she tucked the shawl around the little girl. "You won't leave me, Jack," she said, "but—no, I'm going to bed. Jack and Helmi sat long before the fire. Little Lill in her pretty, white nightdress was fast asleep in her father's arms.

MANUFACTURE OF ARMS UNDER LEAGUE CONTROL

Generalissimo Huai Kwei refused to collaborate with present efforts of the League of Nations to obtain control of the manufacture of arms.

Maxim Litvinoff, Soviet vice-commissar for foreign affairs, in telegraphing this decision to Sir Eric Biddle, president of the League, pointed out his government's contention that the league had done nothing toward solution of the problem of real disarmament.

He is asking that certain steps should be taken to obtain definite results and avoid the risk of future wars. An attempt to supervise the production of armaments is calculated merely to mislead public opinion of how many hours of real disarmament are to be had.

Meanwhile, Canada and the United States are co-operating in an effort to bring about the widest kind of publicity concerning manufacture of arms.

The representative of the United States, Dr. N. W. Biddle, for Canada, voiced disapproval of a draft project reported to the commission which is trying to frame a code of international manufacture of arms, on the ground that it did not go far enough.

Messrs. Biddle and Wilson favored giving the same publicity to arms manufactured by governments as to those manufactured by private firms.

Biddle contended that countries depending largely on private manufacture should not be expected to furnish statistics if countries depending on governmental manufacture were permitted to disclose such figures.

The draft provision with reservations attached will be sent to the League of Nations council, which with the league assembly will be empowered to take whatever action it deems necessary in regard to the project, it would be wise to invoke an international conference for its discussion.

In French circles it is categorically denied that the present naval limitation agreement between France and Great Britain contains any secret clauses. Both British and French spokesmen deny reports that the agreement provides for association of French and British armories.

France and United States, Italy and Japan are awaiting before France and Great Britain publication of the text of the agreement which is described here as an effort to synchronize naval policy and practice by containing what is regarded the underlying idea of the Washington naval conference, the limitation of power and offensive naval fighting machines.

The British government said the agreement, placed before the other naval powers in the hope it would be accepted as a basis for discussion by the league preparatory to disarmament commission. The date of the commission's next meeting depends on the result of these negotiations.

Hists In Berlin

Berlin.—A group of communists, demonstrating, protesting against the proposed construction of a new German anti-aircraft line, were shot and killed by police here and were fired upon. Three persons were wounded seriously and a score were hurt in the rioting. Police arrested 20 after the disturbance.

Criticism Is Resented

Ottawa.—Lord Lovat's Winnipeg comment on Canada's immigration policy has caused a sharp indignation among officials of the Department of Immigration and Colonization. These officials are very sensitive on this question as there has been much criticism of their attitude toward British immigration.

Will Continue Search

Bergen, Norway.—The Russian ice breaker Krasin, searching for exploring and scientific laboratories for future expedition, has proceeded to King's Bay where the Russian aviator Chukhnikov joined the vessel. The ice breaker will continue to Frenz Josef Land, where a base will be established.

Building New Town

The Pan Man.—Surveying at the Gold Lake townsite has been completed. The new town has not been officially named but it will probably be known as Gold Lake. It is surrounded by rich mineral deposits.

Farmer Fails To Fly

Winnipeg.—Commander William Eddie of the Salvation Army, is dead at Balmoral, Scotland, according to word received here. For the past two years he had been in charge of the work in Western Canada.

Chinese Facing Starvation

Crops In Many Districts Have Been Burned

Shanghai, China.—The population of 1,560,000 in a district 30 miles of South China, and Northwest Shantung, is facing death from starvation, said Earl Baker, secretary of the New York-China famine fund committee, who returned from a visit to the stricken area.

There has been sharp differences of opinion, both in China and the United States, regarding the necessity of relief measures.

Mr. Baker, it is concluded, that aid must be sent at once. He

stated that 150,000 persons were in an exhausted state of malnutrition and apparently doomed to death and that 30,000 were slowly starving.

Drifters and grasshoppers have ruined the crops in the same district, said Mr. Baker. He added that the grasshoppers now form part of the diet of thousands of the stricken people. One village, he said, was eating dried grasshoppers on a wholesale scale. The insects being the only food of many houses which he visited.

Declares Navy Pact Letter a Forgery

Foreign Office Says Document Is Probably False

London.—We have now seen a copy of the letter which purports to have been written by Sir Austen Chamberlain, secretary of state for foreign affairs, to the French foreign minister, concerning the alleged terms of an Anglo-French naval agreement, and we have no hesitation in declaring that the letter must obviously be a forgery. No communication of such a nature has ever been suggested by any such a person as is suggested has been passed from Sir Austen to M. Briand.

This statement was issued by the foreign office to the Canadian Press.

The document, a summary of what was published widely in the United States and Canada and received a great sensation, has now been received in London and is stated to be a most patent and palpable forgery.

It is understood that the British government has called in instructions the British embassy at Washington to deny categorically the authenticity of the document.

Little Damage From Rust

Rust Menace Not Materialize

Moose Jaw, Saskatchewan.—There were no signs of the rust menaces which were prevalent in the month of July, the rust menace in Saskatchewan has not materialized.

The statement was made yesterday by M. P. Tuck, Field Crops Department, in his annual report.

He said: "I am in peace," Lord Cushenden said. He added:

"No one imagines that signing this treaty will immediately and finally banish war from the face of the earth. That would be a mistake. Positively, the moral value of the pact remains on the earth, but do not let the cynics be encouraged because the moral value of the pact remains and that is the real value of this treaty."

Lord Cushenden said that personally he divided the credit for the negotiation of the treaty between Foreign Minister Briand and Secretary of State Kellogg, but he was satisfied that the fragments of upholstery were from the giant aeroplane. The British minister emphasized the moral value of the pact, recalling that Napoleon once said that the great war in war was the moral factor.

He said: "It is in peace," Lord Cushenden said. He added:

"No one imagines that signing this treaty will immediately and finally banish war from the face of the earth. That would be a mistake. Positively, the moral value of the pact remains on the earth, but do not let the cynics be encouraged because the moral value of the pact remains and that is the real value of this treaty."

Positively, the moral value of the pact remains on the earth, but do not let the cynics be encouraged because the moral value of the pact remains and that is the real value of this treaty."

Lord C. Chaplin's Mother

Hollywood, Cal.—Mrs. Hannah Chaplin, mother of Charlie Chaplin, of motion picture fame, died at a hospital in Glendale, Calif., yesterday. She was 85 years old. Her remains were returned from a special funeral car to Balfour, where she had been buried.

While the heavy crop stalks and the stalks of grain were saved and stored, the grain, together with the usual amount of moisture in the atmosphere in the month of July, incited the possibility of heavy rust infection. The rust menace in Saskatchewan has not materialized.

The statement was made yesterday by M. P. Tuck, Field Crops Department, in his annual report.

He said: "I am in peace," Lord Cushenden said. He added:

Positively, the moral value of the pact remains on the earth, but do not let the cynics be encouraged because the moral value of the pact remains and that is the real value of this treaty."

Lord C. Chaplin's Mother

Hollywood, Cal.—Mrs. Hannah Chaplin, mother of Charlie Chaplin, of motion picture fame, died at a hospital in Glendale, Calif., yesterday. She was 85 years old. Her remains were returned from a special funeral car to Balfour, where she had been buried.

While the heavy crop stalks and the stalks of grain were saved and stored, the grain, together with the usual amount of moisture in the atmosphere in the month of July, incited the possibility of heavy rust infection. The rust menace in Saskatchewan has not materialized.

The statement was made yesterday by M. P. Tuck, Field Crops Department, in his annual report.

He said: "I am in peace," Lord Cushenden said. He added:

"No one imagines that signing this treaty will immediately and finally banish war from the face of the earth. That would be a mistake. Positively, the moral value of the pact remains on the earth, but do not let the cynics be encouraged because the moral value of the pact remains and that is the real value of this treaty."

"Good Equipment Makes a Good Farmer Better"

Local and General

Found—Crank for motor car owner call at Chronicle office

The bulk of the grain coming to hand during the week at the elevators showed a marked improvement. A very marked extent, grades ranged from four to six. The yield, however, promises to be rather better than was expected, thirty bushels and more to the acre being reported. Threshing has not progressed sufficiently to date to provide actual figures.

The flower show conducted by the Women's Institute showed this year to a considerable extent from the frost which destroyed a great deal of the possible exhibits. The fact that a very creditable display was still possible is a matter for congratulation. This annual flower show has always been one of the greatest

successes possible in every way.

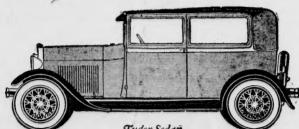

Everything is ready on elevator roads to handle the new crop as soon as it appears with the necessary storage facilities there should be little trouble for some time in handling deliveries. The completion of the Pioneer elevator at present delayed by lack of material, will add several thousand bushels to the storage capacity available.

It is a matter for congratulation that there are so many men in this vicinity, some without money for necessities, that there has been practically no offences of any kind against property. To say the least such a record is highly creditable to the people involved. Recent developments have resulted in practically all the men being provided with work.

The rules governing business have been changed in modern times. It

FORD TRUCKS AND CARS

The Ford Motor Co. have opened an assembling plant in Calgary to take care of the truck trade in Alberta and we anticipate no shortage of Ford Trucks after the first of September. This plant will be turning out fifty trucks a day and the output will be increased to one hundred and fifty in a week's time. The Ford Motor Co. has promised us as many trucks as we can use between the first of September and the first of October. Come in and investigate this eleven hundred dollar wonder.

We unloaded two more Tudor Fords this week and it looks like our waiting days are nearly over.

THE SERVICE GARAGE

used to be accounted permissible to hit a rival who was down. The slogan was, "Business is business," and often it was added, "All's fair in love and war." But the days of such unscrupulous tactics are less countenanced in business today. The spirit of co-operation has made at least some headway against the unfair competition, the meanness, the questionable objectionable practices that were common in America before and during the early years of this century. Neither the courts nor public opinion now sanction practices then indulged in. The corporation that can a reputation for being a fair and honest outfit itself enhanced in a losing battle. The rules of the game, admittedly and unfortunately, are not yet wholly humane. But at least business can claim that the prize ring is not the only realm in which standards have been raised.

To say the least such a record is highly creditable to the people involved. Recent developments have resulted in practically all the men being provided with work.

The rules governing business have been changed in modern times. It

arisen as to the meaning of the word "operator" in the government notice to threshers and owners of combines. The operator is the owner in this instance, not the man in charge for the owner.

"I shot Buck Gordon but no one will never know why." He was a gangster kid—his mother was a great lady. And he was a great kid. And he was a great lady. See "The Noose."

Aris Verschus and family, late of Barons, moved on to the Blazer farm last week.

Through an accident a large portion of the matter intended for this issue is unavailable. It will be printed, as far as it remains of interest, in the next issue.

See the New UTILITY TRUCK

Built to Win Favor on Western Farms

EQUIPPED with the special grain body illustrated, the New Chevrolet Utility Truck is the ideal haulage unit for the Western Canada farmer.

It handles full loads with the greatest ease . . . enables you to cut down the time and expense of hauling . . . and offers dependable performance, even in heavy mud and sand. Practically every part of its chassis is overhauled.

Completely equipped, the New Chevrolet Utility Truck. You will find that it affords everything you could possibly want in a haulage unit of this capacity—unusual power—unparalleled performance—amazing handling ease—and outstanding economy of ownership and operation.

Let us give you figures on its low maintenance costs.
